

**Quantum Net Enhancement Release**  
**Rev. 7/10**

**New Custom Messages:**

(420) Checkout Budget Deny\*

(421) Checkout Budget Approval\*

(422) Checkout Budget Warning\*

\*These will be used on the message popup on the checkout screen, if they submit and have exceeded their budget.

Custom message for password retrieval when user is not registered.

**New QNet Variables to be used with certain custom messages:**

[%calcBudgetUsed] = Returns the amount that has been used.

[%BudgetAmount] = Return the budget amount.

[%BudgetBasis] = Returns the budget type, either "Annual" or "Monthly"

[%BudgetAction] = Returns what action is taken when exceeded, "Deny", "Approval Required", or "Warning".

**In addition to the three new messages using the enhanced message variables, the following messages have been switched to the enhanced message variables on the checkout screen:**

760 Checkout GST Tax description

**Ability to re-size Quantum Net thumbnails**

You can now adjust the size of the thumbnail images on your Quantum Net sites. These adjustments can be made as an increased or decreased percentage of the original size. You will find this option in Sub-Category Setup.

**Suppress Quantity Field:** Remove quantity field when an item has fields requiring the user to enter fields in item detail screen. This would need to work with attribute and extra data fields.
